

# Glow In the Dark

## Diggy

Can you see me glow in the dark  
I'm one with the stars, and never too far  
Yeah Anything worth living is worth dying  
Anything worth giving is worth trying  
I put myself in the shoes of a giant  
With double tube socks, two knots and I tied it  
I was frightened, I was tired  
But I knew that one day I would triumph  
Heard of making noise  
All it took was one guess  
Now I'm blowing like the wind  
Underneath her sun dress  
Ah yes, I can smell the victory  
They used to pick at me  
Now they picking me  
To be the one to hold the torch that liberty  
I'll tell you every detail till I see that vividly  
I tried to warn y'all since air borne  
I'm cold like I left the air on  
I'm dope, I'm dope hair on  
The world's gonna know from here on  
Can you see me glow in the dark  
I'm one with the stars, and never too far  
Yeah  
I can see you closing your eyes  
So don't be surprised  
All it takes is a spark  
Till I glow in the dark I illuminate, I shine  
Let this happen  
For its time  
In time, in time, in time I glow in the dark I illuminate, I shine  
Let this happen  
For its time  
In time, in time, in time I glow in the dark I never let them tell me what I can't do  
God won't give me anything I can't handle  
One candle can light all the rest  
I'll live forever like I got a bite on my neck  
Through my music, through my songs  
This is your amusement, this is my psalms  
My God, forgive them for adultery  
Diggy underscore simmons do you follow me  
Do you dig me, do your history

This didn't happen over night, quite the contrary  
I've been working all my life  
You hear what you hear  
I work hard to get it right  
They can measure light, they can't measure darkness  
I ain't on my strikes, that's preposterous  
First I couldn't grab 'em but look at how I have 'em  
Who would've thought that your thought it couldn't happen  
Can you see me glow in the dark  
I'm one with the stars, and never too far  
Yeah  
I can see you closing your eyes  
So don't be surprised  
All it takes is a spark  
Till I glow in the dark  
I illuminate, I shine  
Let this happen  
For its time  
In time, in time, in time I glow in the dark  
I illuminate, I shine  
Let this happen  
For its time  
In time, in time, in time I glow in the dark  
Maurice Freehill once said  
Who is more foolish?  
The child who is afraid of the dark  
Or the man afraid of the light  
Glow in the dark  
No friends, For everything around you is within you  
Illuminate  
Glow in the dark  
Glow in the dark  
Glow in the dark
