

# The Astronaut

## Something Corporate

I've been sleeping with ghosts  
I've been watching stars  
Crawling out of the sky  
And I've been hoping  
I'm close to the space man movies  
I call my life And I've been climbing ladders through time  
I've got tunnel vision  
But I'm doing fine  
And I've been  
Watching stars coming off of the wall  
And maybe if I'm lucky I can catch them  
Before you fall  
And you are not alone  
Calling out to the astronaut  
I need some of what you've got  
I need to be high  
Crawling out of the world she brought  
Calling out to the astronaut  
I need to be high And I've been holding  
This microphone  
And I've been shouting out  
But I think we're alone  
And I've got platinum vision  
Innocent for the touch  
I've got you to propel me  
But I still need so much  
Not to be alone  
Calling out to the astronaut  
I need some of what you've got  
I need to be high  
Crawling out of the world she brought  
Calling out to the astronaut  
I need to be high And you are not alone  
You are not alone  
You are not alone Calling out to the astronaut  
I need some of what you've got  
I need to be high  
Crawling out of the world she brought  
Calling out to the astronaut  
I need to be high  
Calling out to the astronaut  
I need some of what you've got

I need to be high  
Disappear in the world she brought  
Calling out to the astronaut  
I need to be high And I've got you to propel me  
But I still need so much
