

Origami

Capital Cities

Origami (or or or ori o or I ga mi)
Origami (or or or ori o or I) You got a head full of paper, but baby nothing like origami
Shredded thoughts and make up won't make up for the missing piece of mind
I saw you look in the mirror, the scenery was suddenly boring It's the end of an era
Forever is just a state of mind
You're last of your kind I stole your diamonds and gold
What are you going to do
I stole your diamonds and gold
What are you going to do about it (do about it) You were blessed with precision so I took you to
the beaches of Bali
It wasn't fate but decision, luck was choosing sides
Flip the page to a silver age
Life has treated you kindly
The price you pay is your vision
Collision is highly likely I stole your diamonds and gold
What are you going to do
I stole your diamonds and gold
What are you going to do about it (do about it) I stole your diamonds and gold
What are you going to do
I stole your diamonds and gold
What are you going to do about it (do about it) I stole your diamonds and gold
What are you going to do
(Origami)
I stole your diamonds and gold
What are you going to do about it (do about it)
I stole your diamonds and gold
What are you going to do
(Origami)
I stole your diamonds and gold
What are you going to do about it (do about it)
