

My World (feat. Jorja Smith)

OSHUN

Oh I am a whole world
Oh I am a whole world It's funny how things never change
Past, present, future all the same stuff
And I know that I'm still learning things
How to live, how to love And I, and I know you won't trip cause you're falling from the stars
And we already aligned
So you know I'm gonna the whole world, yeah
You know I do
Love loving you
So I'll give my whole world to you
And you don't have to be afraid
I'm in love and you're the flame
My love for you will never change up
Before and after all the fame
Let's talk about it
Baby, don't doubt might be gone for a while
But I think about your smile
When I come home it's you and me
Physically and mentally
Baby, I will never leave as long as you go by And you know I won't dip cause you're falling
from the stars
And we already aligned so you know I'm gonna give my whole world
You know I do
Love loving you
So I'll give my whole world to you
'Cause I'm hoping love will never change but
I'm cautious cause I've come from our love
So take it easy if you think we gon trust
Don't think that you're obliged to recognise my feelings
Before you even knew me
I take it back don't take it easy on me
'Cause loving you is a different thing
My heart's not used to feeling so in sync
Just used to using all its peace to be me And I know you won't trip cause you're falling from the
stars
And we already aligned so you know I'm gonna give the whole world
You know I do
Love loving you
So I'll give my whole world to you Some things will never change
But I'm hoping that'll never change us
Be a pity if I stayed the same
I went from growing I need you to grow up

It's funny how I found my flame
Reflection of our creator
And I'm loving that it feel the same way
And I know my friends they all gon flame us We a trip falling from the stars
And we already aligned so you know I'm gonna the whole world
World, world, world, world, world, world
You know I do
Love loving you
I'll give my whole world to you
Yeah, yeah, yeah it's funny how things never change
Past, present, future all the same stuff
And I know that I'm still learning things
How to live, how to love
World, world, world, world, world, world
