Natural Disaster (Skream Remix)

Laidback Luke & Example

My friend said think all the bad things
My friend said thing all the fights
And then it should be easier to walk away
No more sleepless nightsAnd even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after

Happiness and laughter... what a natural disasterNeed to tell myself I don't care
Need to tell myself you're not thereNeed some air, need some space (x2)
Need some air... the way I'm feeling I just don't careAnd even though I don't need you
You're clearly the best thing that happened to me

We should be happy ever after

Happiness and laughter what a natural disaster

Don't take it for a fool, never

We've been floating down the one way river

No way back can't paddle upstream

I supposed I had a fucked up dreamHad enough of you had enough of me

What can I say, I'm in a one man team

Scheming, dreaming wheeler dealing

Feeling strange I'm in love with the sceneGeneral malice, seminal talent

Two many brain sells, chemical imbalance

One day soon I'll get it all examined

'Till then I'm going all Biff TannenRewrite the future, new ruler

Too cool now, well it don't suit ya'

This is Starship Troopers livin' in a whole other planetReboot computer (x2)

Need to tell myself I don't care

Need to tell myself you're not thereNeed some air, need some space (x2) Need some air... the way I'm feeling I just don't careAnd even though I don't need you You're clearly the best thing that happened to me

We should be happy ever after

Happiness and laughter what a natural disaster You're far too good for me

Said you're far too good for me

We should be happy ever after

Happiness and laughter... what a natural disaster.
