Meanwhile

Fool's Garden

You've changed the world around you
Is it better now?
No starving anymore
Hey, is it better now?
Your helpless little fingers
They've never been as calm as now
Your trembling is over
It's better nowIf there was a light in the dark
I would try to wake you up
Could I look into your eyes
While another baby cries

Forgive me I see the children in the playfield

You had to leave your place

Your silent accusation

They took away your face

Your little life was over

before it ever had begun

Your little wings were broken

You've never reached the sunIf there was a light in the dark

I would try to wake you up

Could I look into your eyes

Would you take my alibis

Forgive meEv'rybody knows it

Repression is the way

You're not the child next door

You're much too far away

But there's no light in the dark

So I won't try to wake you up

I couldn't look into your eyes

In this world of alibis

Forgive me
