

# Bella Donna (Remastered)

Stevie Nicks

You can ride  
High atop your pony  
I know you won't fall  
'Cause the whole thing's phoney  
You can fly swinging  
From your trapeze Scaring all the people  
But you'll never scare me My Bella donna  
And we fight for the Northern Star  
No speed limit, this is the fast lane It's just the way that it is here  
And you say  
I never thought it could  
Bella donna  
And we fight for the Northern Star  
And the lady's feeling  
Just like the moon that she loved  
Don't you know that the stars Are a part of us?  
Oh, and the lady's feelings  
Like the moon that she loved And you say  
That I never thought it could  
My Bella donna  
Come in and out of the darkness You are in love with And I'm ready to sail  
It's just a feeling  
Sort of captures your soul  
Bella donna  
And the woman may be so awestruck And the woman may truly care But the woman is so tired  
So the woman disappears  
Come in, out of the darkness  
Bella donna, my soul  
Don't change, baby  
Please don't change  
And you say and your face becomes thin  
And you never thought it could  
Come in out of the darkness  
Bella donna  
You are in love with  
I'm ready to sail  
It's just a feeling
