

One Day You'll Be Mine

Usher

Yeah, check it out
I'm sayin' you gon' be mine
First time I saw you baby you did something to me
That no else has ever done
Something in your eyes caught me by surprise
And told me that you were the one
But what's bad is I know you got on man and he'll never
understand
The chemistry between me and you, ah baby
Something inside of me it's saying you and I were
meant to be
If you can think it you can have it that's why I believe
One day you'll be mine, mine
No more creepin', sleepin' around
Whisperin' when he's around
One day you'll be mine, mine
No more creepin', sleepin' around
Whisperin' when he's around
Now every time I see you baby it's plain to see
That I'm everything you've been missin' at home baby
So much love to share it's something in
the air
Tellin' me I should never leave you alone
But even through I know you got a man he'll never
understand
The chemistry between me and you, ah baby
You can try to stop it but it won't quit
You say you don't when I know that you want It
I know, one day you'll be mine
One day you'll be mine, mine
No more creepin', sleepin' around
Whisperin' when he's around
One day you'll be mine, mine
No more creepin', sleepin' around
Whisperin' when he's around
One day you'll be mine, mine
No more creepin', sleepin' around
Whisperin' when he's around
One day you'll be mine, mine
No more creepin', sleepin' around
Whisperin' when he's around
