

Let It Blaze

J Boog

...and it not nice when police lock down the soul, its like we living in Alcatraz everyday
with an overload stress on the brain
Just let us stay let us stay let us stay blazing igrade everyday, yeah.
And let us stay let us stay playing roots reggae music always, yeah.
Sweet smell of igrade blaziing in the air someone play the music people wanna hear
This is so for real so babalon know the deal, and respect the vibrations where you are feel.
Just enough, just enough ...
And da war and da war so don't disturb the vibe star,
Just to try to prosper not trying to win an oscar babalon here with J Boog.
...and it not nice when police lock down the soul, its like we living in Alcatraz everyday, with
an overload of stress on da brain.
Just let us stay, let us stay, let us stay blazing igrade everyday, yeah.
and let us stay let us stay playing roots reggae music always yeah.
Like so men... I saw the world no igrade, not trying... so babalon stop fighting, cannot correct
the past and how you feel about it.
Herbs and reggae music, the world can't live without it.
just let the naturalistic flow, let reggae music touch your soul, soul.
when it hits you will know, that the feeling that you feel your not alone.
