

If They Only Knew

Black Atlas

[Intro]

What's she want?

Does she love me?

Through the hell, she's talking back

Do I know

My heart wandered

Through the cold of the night?[Pre-Chorus]

Been here for too long

But not for the fall

Been here for too long

You can't take it all

[Chorus]

The way I feel for you

If they only knew

The way I feel for you

If they only knew[Verse]

Left me alone right after you caught me up

I never thought I'd be the one to ever fall in love

I can't escape the things you do even after you're gone

But baby, I follow you still

Oh, I loved you

You ride through the dark

I like the way you laugh

The way you see it fall apart

Now I can never be the same that I was at the start

Girl come on, make it, babe

[Pre-Chorus]

Been here for too long

But not for the fall

Been here for too long

You can't take it all[Chorus]

The way I feel for you

If they only knew

The way I feel for you

If they only knew[Bridge]

If they only knew

If they only knew

If they only knew (if they only knew)

If they only knew (if they only knew)

If they only knew

If they only knew

If they only knew

If they only knew
If they only knew
If they only knew
If they only knew
