You Were the One

Binocular

It's Friday night and I can
Just talk for hours and hours
'Til I wake up and wonder
Where the time wentWhen you were the one I loved
You were the one I loved
You were the one I lovedYou were the one I loved
You were the one I loved
You were the one I loved
I lovedNow lock your doors and chain up
All of your mixed emotions
'Cause they will come and get you
Just when you don't
'Cause you were the one I loved
You were the one I loved
You were the one I lovedYou were the one I loved
You were the one I loved
You were the one I lovedYou just look around and wonder why
You've wondered so long so hard and you're still wrong
I'd have taken you back, I'd have taken you back
When you were the one I lovedSo we've been through the motions
And suffer these delusions
I'll dream away my sorrows
On through the night'Cause you were the one I loved
You were the one I loved
You were the one I loved
You were the one I loved
You were the one I loved
You were the one I loved
I loved
