

slow motion

Flor

Easy to see it wasted
Deep in the summer time
When the world's on fire I feel and taste it
Sticks to the roof of my mouth
Lasts through the night It's coming in a little bit hot, see
Loving what I feel but it gets to me
And I know it's all in my head
And it still makes the world feel a little like it ain't real
I swear you move slow motion
Watching you looks like bending time
Catch me in your illusion
Helping me lose my mind Douse it in the water
Cool when you feel it
Hot but it's turning down
It hurts to leave it
But it's much too much to handle now It's coming in a little bit hot, see
Loving what I feel but it gets to me
And I know it's all in my head
And it still makes the world feel a little like it ain't real I swear you move slow motion
Watching you looks like bending time
Catch me in your illusion
Helping me lose my mind
I swear you move slow motion
Watching you looks like bending time
Catch me in your illusion
Helping me lose my mind
