Fire Burns Bright

Binocular

As we've heard before today
The land is ripe in times of change
So why can't we look at things the way we used to do
'cause they're never gonna be the sameAnd I can't lose
You should have known
So tell me why should I tell myself that things are going on
If we're never gonna make that changeI don't wanna go back home
And leave you hopeless in the night
But I fear the worst and then I just fear what we'll lose
So lets dance into the moonlit night
'til the fire burns bright
I know you hear the things I say
Though secrets kept me far away
So let's discover what we can while were here
If we're ever gonna turn that pageAnd I can say
But you've always known
So tell me why should I shelter and protect you in the storm
When the sun still shines as yesterdayI don't wanna go back home
And leave you waiting in the night
But I fear the next step that we take we'll go too far
So let's hold on while we've got tonight
And the fire burns bright
'til the fire burns bright
But I fear the worst and then I just fear what we'll lose
So let's dance into the moonlit night
'til the fire burns bright('til it burns)
'til the fire burns bright
