Alkaline

Timeflies

This could be all you need
This could be all you see
You're trying to hide
From what you could find
You're starting to breathe
This could be all you know
And everywhere you go
Closing your eyes
If only to find
You start to believeBut if this is all we are
Stuck in a dream so bad
When you're wide awake
You try to escape
But you're already free
We are alkaline
Searching desperately
Wander streets at night
Fighting just to breathe
We are alkaline
Chasing ecstasy
Tied to what we find
Lost in symphony
Of alkalineYou're fast asleep
Chasing the past you keep
Trying to go
But somehow you know
That you'll never leave
And if this is all we have
Stuck in a dream so bad
When you're wide awake
You try to escape
But you're already freeWe are alkaline
Searching desperately
Wander streets at night
Fighting just to breathe
We are alkaline
Chasing ecstasy
Tied to what we find
Lost in symphony
Of alkalineBut if you find you first
Whisper a thousand words
You open your eyes

You finally find
That now you believeWe are alkaline
Searching desperately
Wander streets at night
Fighting just to breathe
We are alkaline
Chasing ecstasy
Tied to what we find
Lost in symphonyOf alkalineThis could be all you need
