The One

Blu Cantrell

Moo ooh aah
Yeah yeah yeah
Oh oh oh, ho ho ho ho, ho ho hoI have been looking for a man to stay here till the end
He will not just be my lover he'll be my best friend
He will always be a guiding force in my life
Pick me up when I am down
And then he'll hold me tightHe will never leave me standin' in the pourin' rain
He will never disrespect me call me out my name
He will never have me waitin' till the mornin' comes
I will always be his baby when it's said and done
'Cause he'll be the one
'Cause he'll be the one
'Cause he'll be the one
'Cause he'll be the one, woaHe will always be the one to wipe away my tears
He will always be the one to kiss away my fears
He will always be there makin' everythin' alright
Be the one to always love me no more lonely nights, ohhHe will never leave me standin' in the pourin' rain
He will never disrespect me call me out my name
He will never have me waitin' till the mornin' comes
I will always be his baby when it's said and done
'Cause he'll be the one
He will never leave me standin' in the pourin' rain
(Yeah yeah yeah yeah)
(Hey hey hey)
He will never leave me standin' in the pourin' rain
(He'll never leave me stand there)
He will never disrespect me call me out my name
(And better call me out my name)
He will never have me waitin' till the mornin' comes
(Ohh ohh ohh ohh ohh)
I will always be his baby when it's said and done
(Ohh I will be be his baby)
'Cause he'll be the oneHe will never leave me standin' in the pourin' rain
(Yeah yeah yeah yeah)
He will never disrespect me call me out my name
(Ohh ohh ohh)
He will never have me waitin' till the mornin' comes
(Till the mornin')
I will always be his baby when it's said and done
'Cause he'll be the oneHe will never leave me standin' in the pourin' rain
(Ohh ohh ohh ohh)

He will never disrespect me call me out my name
(He will never leave me, never ever, never ever)
He will never have me waitin' till the mornin' comes
I will always be his baby when it's said and done
'Cause he'll be the one
(Ohh hoho ohh, yeah)
