Stand Above Me

Orchestral Manoeuvres In the Dark

We always stick together
Like we're something made of glue
And justify the passion
Saying one is more than twoBut if you don't believe the words
They're surely to come true
There's one thing that's so obvious
But it's something you won't doBecause you stand above me
But I know you don't
You say you love me
But I know you won't
We always say we're happyWhen you know it's never true
But I was just so frightened
Of the things you'd say and doBut if you don't believe the words
They're surely to come true
It's starting to be so obvious
That it's something you won't doBecause you stand above me
But I know you don't
You say you love me
But I know you won'tBut if you don't believe the words
They're surely to come true
There's one thing that's so obvious
But it's something you won't do
Because you stand above me
But I know you don't
You say you love me
But I know you won't
