Paint It Black

Andy Black

Don't you know
We're still gold
Just another day we made mistakesFace the rain
Don't walk away
There's another chance to set it straightIt's not too late to turn back home
And we were never meant to be alone
You know we've got each otherIt's not too late for two lost souls
We're not the only ones to lose control
But we're in this together, yeahEvery time you walk away
I lose the one I need to save
I just paint it black
Like starting over
Every time I lose a fight
And I'm dying to be right
I just paint it black
So you rememberThis won't last forever
It's just another nightSame old song
We sing along
Never knowing how it's gonna endI am here with love my dear
We can let it go and start againIn my heart we share a home
And all the years that we have grown
You know we've got each otherSo hear me out and don't give up
The world is ours and with our love
We're in this together, yeah
Every time you walk away
I lose the one I need to save
I just paint it black
Like starting overEvery time I lose a fight
And I'm dying to be right
I just paint it black
So you rememberSo look in my eyes
Clear as the skies
You can see right through me
Your heart bleeds through meNo matter where you are
I won't leave you behind
We'll make it out alive
We'll make it out aliveEvery time you walk away
I lose the one I need to save
I just paint it black
Like starting overEvery time I lose a fight
And I'm dying to be right
I just paint it black

So you rememberEven on a final day
When you can find your way
I just paint it black
Like starting overThis won't last foreverIt's just another night
It's just another night
