Mirah

Heard a shot rang through the woods
Couldn't tell from what direction
Spun around and tried to see
If there were two if there were threeThe mist came down the ground was wet
I talked with you inside my head
The way I have forgotten back
Quickly prepare it's an attackListen for the sound
Feel a shaking underground
To have the weapons and the time
The will to push off from the side
I use my eyes, and use my head
I use all of the things you said
A person needs to know before
A hunting, hunting we will goOh, my beloved alleyway
To go it takes a lot of patience
Figure out the constellations
Work on the coordination
Listen for the sound
Feel a shaking underground
To have the weapons and the time
The will to push off from the sideListen for the sound
Listen for the sound
