It's True What They Say About Love

Peter Brown

Timid and shy but willing to try something new
She fell in love with a guy who was passing through
And it's love we create with a touch of a hand
But the empty reply we do not understand
And they say love is blind when the heart takes commandWell, it's true what they say about love
True what they say about love
Yes, it's true what they say about love
True what they say about loveAsking for more than they've given before in return
Growing as one is a lesson they promise to learn
And it's love that is found in the silent embrace
Close your eyes so the darkness will hold us in place
And they say love is lasting, time will never erase
Well, it's true what they say about love
True what they say about love
Yes, it's true what they say about love
True what they say about loveLovers afraid of the promises made in the night
Strangers who wake
As their memories fade in the light
And it's love that it's lost in the games that we play
All we hold is a moment that soon drifts away
And they say love is fleeting, and it's true what they sayWell, it's true what they say about love
True what they say about love
Yes, it's true what they say about love
True what they say about loveWell, it's true what they say about love
True what they say about love
Yes, it's true what they say about love
True what they say about love
It's true what they say about loveWell, it's true what they say about love
True what they say about love
Yes, it's true what they say about love
True what they say about love
