Crucial

Kottonmouth Kings

What is this a binary reality, dazed in refracting light
? ether from nothing
What is this a hallogram, an endless platform
What have we done to enhance this design
Where do we go when we fear to resign
What have we done but learned to kill faster
Where have we gone but straight for disaster
Dreamtime is fading wakeup and decide
This nightmare ends now
Made a deal with the?
But you undecided?
I decided everytime the shit was?
?
To rewind and look deep in your eyes there
? say you got stolen pride
Well I know who took it
Handed you the recipe you just couldn't cook it
Lost in a world cuz technology's wildI taken a look at the world today
It's a poisoned joint feeding greed and hate
You're either living in love or living in fear
? tell me is the end near
So damn easy to think we've won
Man over machine is the illusion
It's a journey forget the destination
We've engineered our own destruction
Emergency, Emergency, 911
America's sound - there's no compassion
It's never too late no where to run
Emergency, Emergency, 911
It's crucial in this time
Time has come for all
It's crucial we should be united soul mind and heart
For realKnow how to? I can barely work my facts
Triple beam on the scene when im weighing my sacks
Fuck Y2K you people need to relax
Living like a drone trapped in a time zone
Now times burning away like the wick of a candle
Modern technology's to much to handle
? label us as vandals
Breakin' laws they laid never beaten by exampleThe world today were ran like robots
IBMs, Apple lls, and Mactintosh
Microsoft this world's gettin lost

The boss? wrong but he can't pay the cost
Parked the wrong lot in the parkin lot
Ya i smoke pot cuz i puffs a lot
Connected the dots i picked this pot
Who is he what is it?Emergency, Emergency, 911
America's sound - there's no compassion
It's never too late no where to run
Emergency, Emergency, 911
It's crucial in this time
Time has come for all
It's crucial we should be united soul mind and heart
For realOh no they log us in to view
Satalite dishes got us all suspicious
Computer control the world is confused
? right wing malicous
Got the cure but the help they refuse
Survival of the fitest if you fit with the richest
Created a monster with power to abuseAll mankind the virus
Computer seem to find this obsolete
All mankind designed it
The machine say its time to DeleteIts a vicous cycle in over generate
Power's out to conquer infest annihilate
Money taxes faxes religion love and hate
Power greed and envy the new computer age
Its a vicious cylce this crazy thing called life
Big brother stamps you with a code preparing you to die
Money money money you need it to survive
Slave away the status quo trapped in a nine to fiveEmergency, Emergency, 911
America's sound - there's no compassion
It's never too late no where to run
Emergency, Emergency, 911
It's crucial in this time
Time has come for all
It's crucial we should be united soul mind and heart
For RealIt's crucial in this time
Time has come for all
It's crucial we should be united soul mind and heart
For RealEmergency, Emergency, 911
America's sound - there's no compassion
It's never too late no where to run
Emergency, Emergency, 911
(x2)
