Favourite Thing

Yuna

It's in the way you drink your coffee
And how you have faith in me
And you love the camera
And you tell me that I'm good enough
Well you bubble wrap my heartAnd all things that I used to be afraid of
Suddenly it all disappearedYou'll remain my most favourite thing
And everywhere I go you're here with me
You'll remain my most favourite thing
And all the time I keep you near me
The way you look out of the window
And you stay because you know
It wasn't your intention but you can't help but secretion
Like the wave I've been waiting forAnd all things that I used to be afraid of
Suddenly it all disappearedYou'll remain my most favourite thing
And everywhere I go you're here with me
You'll remain my most favourite thing
And all the time I keep you near meWhen I feel like the world has turn its back on me
When I feel all alone and I'm laughing with nobody
When people wanted me somebody else
But you loved me completely
You'll remain my most favourite thing
And everywhere I go you're here with me
You'll remain my most favourite thing
And all the time I keep you near me
You'll remain my most favourite thing
And everywhere I go you're here with me
You'll remain my most favourite thing
And all the time I keep you near me
And all the time I keep you near me
